Educators, please also sign up in  
MyPassport with course # **25780**  
to get seat time.

Dr. Turner will explain a variety of ways to differentiate instruction that will support our gifted/advanced students as we move forward from the pandemic. This year has been an interesting one, and has left our students in a variety of places, which has necessitated some out-of-the-box thinking for our students. As we finish this year and move on to (hopefully) a less traumatic version of a school year, we should keep in mind that our gifted/advanced students need all different kinds of support and extensions.
